

W.C.E.S.C. Weekly COVID-19 Public Report

| | This Week 5/3/2021-5/7/2021 | Last Week 4/26/2021-4/30/2021 |
|------------------------------|---------------------------------------|---|
| Employees Quarantined | 0 | 0 |
| Employees Isolated | 0 | 0 |
| Students Quarantined | 0 | 0 |
| Students Isolated | 0 | 0 |

Definitions:

- Quarantined – 10 to 14 days is the length of time that anyone who has been in direct contact with someone who tests positive for the COVID-19 virus must quarantine as symptoms can start anywhere from 2 – 14 days after exposure. The quarantine period starts on the last day the person was known to have had contact with a person who tests positive. The quarantine may end only after the 10 to 14 days and the individual was symptom-free the entire time.
- Isolated – Individuals with symptoms who: were screened and are at home, had a positive test or have a probable diagnosis.

Note: W.C.E.S.C. cannot disclose specific case information due to FERPA/HIPAA laws.
