

## W.C.E.S.C. Weekly COVID-19 Public Report

This Week	Changes from Last Week	
9/07/2020 – 9/11/2020	8/31/2020 – 9/5/2020	
Employees Quarantined	0	0
Employees Isolated	0	1
Students Quarantined	0	0
Students Isolated	0	0

### Definitions:

- Quarantined – 14 days is the length of time that anyone who has been in direct contact with someone who tests positive for the COVID-19 virus must quarantine as symptoms can start anywhere from 2 – 14 days after exposure. The quarantine period starts on the last day the person was known to have had contact with a person who tests positive. The quarantine may end only after 14 days if the individual was all symptom-free the entire time.
- Isolated – Individuals with symptoms who: were screened and are at home, had a positive test or have a probable diagnosis.

**Note:** W.C.E.S.C. cannot disclose specific case information due to FERPA/HIPAA laws.
